

# Adobe Sign

State of Utah's Electronic Signature solution

Utah Department of  
Technology Services

## What is Adobe Sign?

Adobe Sign is an e-signature solution that lets you replace paper and ink signature processes with fully automated electronic signature workflows. With it, you can easily send, sign, track, and manage signature processes using a browser or mobile device, essentially allowing you to continue working from anywhere using any device.

## Document Security

Adobe Sign conforms to industry security standards by utilizing AES 256-bit encryption protection for data, one of the most advanced encryption protocols available.

**NOTE:** You may not use Adobe Sign for HIPAA, CJIS, IRS 1075, SSA or any other Regulatory Compliance requirements for documents that ask for any personal or sensitive information pertaining to said requirements.

## E-sign Legality

Adobe Sign provides a trusted and legal solution to capturing signatures electronically. Electronic signatures are an accepted form of signing both within the State of Utah ([Title 46-4-201](#)) and industrialized countries around the world.

*"Electronic signatures have the same legal status as handwritten signatures throughout the United States, thanks to the ESIGN Act and the Uniform Electronic Transactions Act (UETA)."* - Adobe Document Cloud Team

## Sign up

If you're interested in onboarding your agency, please work with your IT Director. If you would like to schedule a consultation to see if Adobe Sign is right for your process or agency, please send us an email [DTSEsign@utah.gov](mailto:DTSEsign@utah.gov). Our onboarding schedule for agencies is based on a first come first serve basis. We would like to be able to accommodate your schedule, but we hope you understand any delays in scheduling upon receipt of your request.

# Send. *Sign*. Done.
